Transport and Float Over of USGIF Project Decks

1st June 2009, Posh Semco's 2 units 12000BHP 157TBP AHT Salviceroy and Salvigilant towed HHI's launch barge Hyundai B 1006 loaded with 16,500mt decks from Ulsan to offshore Abu Dhabi for the Umm Sharf project. The voyage took 35 days arrived at offshore Abu Dhabi in mid July 2009. Both tugs assisted with positioning of the barge into position through the pre-installed jacket and thereafter the decks were successfully installed by float over on 25 July 2009.
